### Hydrogen Miner Offering :

Hydrogen Miner product offerings may assist "The Dairy Industry" in various ways, from general cleaning, micro-organism reduction and Veterinary science toolset installations. Hydrogen Miner's Oxygen port may be equipped with an optional Ozone generator. Ozone may then be introduced into soluble form using a bubbler.

### Water Saturated Ozone for you Stalls :

Hydrogen Miner offers a solution for stall cleaning when cows are out to pasture. Many cleaning products leave chemical residue that may cause skin irritation of Milking cows. Ozone does not leave "chemical residues" and decays over time.

### Ozone Treated Waste Benefits :

Treatment of Dairy Waste offers a method of reduction of fermentable unoxxygenated waste matter. Industrial use of Ozone is used to treat both waste water and in City water supplies. Waste treatment by Ozone can reduce micro-organism, yeast, and viral (IU) infectious units.

### Veterinary Tool Sets :

Veterinary treatment of animals by Ozone is unexplored by Emarena. Please consult your Veterinary services as to method of hoof treatment, dunk tank, swim tank and other therapeutic treatments by way of saturated Ozone in water.

### Requirements and Standard Setup:

- Venturi or zero back pressure point of introduction for sludge pump processing.
- On site electrical box and protective containment in the form of a pen, room cell or container is suggested.
- An isolated electrical box or room with variable voltage supply of 5-50 Volts, 1A/V.
- *As per industrial code: If necessary, in house Electricians and industrial gas or plumbing specialist may be required.*

### Fee Schedule 2024:
